

SOLERA ASSOCIATES LLC
PROUDLY PRESENTS:

ACCELERATE YOUR PROJECTS!!!

"The rapid tempo, the extensive agreements, and the complete picture that it yields instill confidence and success into any project."
Paul Bertucci, Chief/Enterprise Data Architect, Autodesk

Are your projects too slow? On idle? Or maybe just not fast enough? How can you:

- Accelerate your projects?
- Quickly build a realistic plan and get the team's buy in?
- Increase the likelihood of success?
- Monitor progress without micromanaging?

Accelerate your projects through **Commitment-Based Project Management (CBPM)**!

Developed at Intel Corporation for its chip projects and successfully used by education, manufacturing, wineries, software, and high-technology organizations, to name a few, CBPM focuses on what's important: what needs to be completed by when and for whom; how to secure commitments from the team that they deliver to; how to monitor without micro-managing; how to ensure successful execution.

For more information: <http://pmlead.com>, email jose.solera@pmlead.com, or call 919-383-9319

What you will learn in this one day workshop, previously delivered at PMI Silicon Valley and Symantec:

- How-to's to turn projects from difficult, slow, and frustrating projects to smooth running, fast machines
- Information, hands-on exercises, references, and tools to help you complete projects successfully including a tool to track and manage your projects
- Insights on how to lead projects to success!

Who should attend: Project Managers who know "there must be a better way" and want faster projects; executives who want faster projects; team members who want to do the "real" work and less status reporting.

When and where?

Friday May, 29, 2009, 9 AM – 4 PM (registration opens @ 8:30 AM)
Croasdale Country Club, 3800 Farm Gate Ave., Durham, NC 27705
Directions at: <http://tinyurl.com/cyfrfv>

The instructor:

Jose Solera, PMP
West Point, VA
25+ years of experience and former president PMI Silicon Valley. He has managed projects and programs of all sizes in IT, security, and marketing. At Intel he led Y2K, the post-9/11 response, and programming projects including the Intel Inside® Program system. He has applied, taught, and mentored on CBPM at Symantec and at PMI Silicon Valley. He instructs at Cornell's Johnson Graduate School of Management Leadership Skills Program.
